Load Capacity	104Kg 230lbs

Secur-it Basket Handle

INDUSTRIAL APPLICABILITY and ADVANTAGES
– The value of goods lost by shoplifting has been estimated to exceed 5% of the total. Any product capable of reducing the losses is a vital tool, especially in shops where margins are low.

Easy Grip Handle

The baskets smooth handles provide a secure grip that removes the danger of pinching and provides your customers with a comfortable shopping experience. Shoppers that are comfortable in store stay longer and buy more.

The Shopping Basket Security Handle incorporates either an RF (Radio Frequency) or an AM (Acousto Magnetic) tagging device which triggers an alarm when passed through security gates. The tagging device is undetectable and irremovable from the basket handle. The Security Handle provides a means for making shop-lifting more difficult and is particularly popular with high volume outlets.

Space-Saving Stacking

The design of the basket means that the handles are completely recessed allowing for nesting distance of less than an inch or 25mm. Less nesting distance means you can stack more baskets in less space.

Raise Your Brand Image

Put it on the basket! Our basket's integral design includes a large smooth surface area for hot stamping your company logo.

Basket Colours

The baskets come in a full range of colours including Red, Black, Blue, Green, Orange and Yellow.
